PROFESSIONAL SKILLS

FRONTEND SKILLS

Vue	SCSS	Gulp	Flexbox
React	LESS	Composer	Grid
JS & jQuery	Accessibility	Nuxt	Bootstrap

BACKEND SKILLS

PHP	Laravel	MySQL	AWS
Python	Django	SQL Server	Azure
C#	.NET Core	Docker	Linux

CMS EXPERIENCE

Wordpress	Magento 1 & 2	Shopify
Umbraco	Pimcore	.NET Core

ABOUT ME

I'm a full-stack developer who loves to make websites and web apps that look and function smoothly, quickly and beautifully. I have a wide range of knowledge and skills combined with a unique ability to learn quickly and adapt to new technologies and workflows easily.

I have a strong personal drive to excel at any task I am given, but also love working with a group of skilled teammates to accomplish team goals.

I would love to join your team!

EXPERIENCE

2019 - NOW   WEB DEVELOPER - MARLIN NETWORK

While working with the fantastic team at Marlin Network, I have had the opportunity to work with many technologies and languages. The project I spend the most time with is SmuckerAwayFromHome.com. It's a Pimcore (PHP) based website. This site (and many other sites we worked on) include several vue apps as well as a headless Magento integration for e-commerce. Another notable project is the MelFry landing page done for Ventura Foods. It was a very complex scroll-based design written in Nuxt/Vue.js using Scroll Magic. Most of our sites run on Umbraco, a .Net based platform written in C#.

2018 - 2019   WEB DEVELOPER - WEBARC TECHNOLOGIES

Working with WebArc Technologies I created and maintained highly custom websites on both the Wordpress and Magento platforms. The most notable project I worked on was to create a completely custom multi-warehouse inventory management system using the Laravel framework. Other projects I worked on are custom modules for the Magento platform, as well as migrating Magento 1.x sites to the new 2.3 version. Additionally, I created advanced Wordpress sites following intricate designs. These sites included image mapping, gated content, and countless custom variables to create beautiful dynamic websites.

2017 - 2018   LEAD DEVELOPER - FRANK AND MAVEN

As the lead developer for Frank and Maven, I managed nearly 100 unique web servers and nearly 130 different websites. Most of these were on the Wordpress platform, while others were on Magento, Shopify and even completely custom frameworks. My role was not only one to complete the technical aspects of the job, but also to help advise and communicate with clients on their technical/web needs.

EDUCATION

2008 - BS BROADCAST MEDIA
University of Central Missouri
